

# MaxPlus Export Shippers

## Pre-Qualified Inter-Continental Shippers for Blood and Blood Products

### At-a-Glance

- **One-way shipper for domestic and international transport of refrigerated blood products**
- **Qualified at 1-10°C for 48 to 72 hours per ISTA 7D standards**
- **Simple, universal all-season packouts**
- **Robust construction to withstand the rigors of 3PL and airline handling**

### One-Way Export of Blood Products

The MaxPlus Export Shippers combine unprecedented thermal performance and operationally effective packouts that work across the widest range of shipping conditions. The shippers are qualified to maintain refrigerated blood products at 1-10°C for 48 up to 72 hours.

### Simplified, All-Season Packouts

With purpose-built packouts, the MaxPlus Export Shippers are easy to implement in operations. Each shipper is equipped with the necessary coolant packs needed to protect and maintain temperature during transport.

### Qualification and Validation

MaxQ's design and validation team can help select and qualify the shipper based on each blood center's unique transport and blood product needs. Blood centers can choose to conduct their own validation internally, or outsource the process to MaxQ's validation experts.

# MaxPlus Export Shippers

## Specifications

The MaxPlus Export Shippers were designed by scientists specifically for one-way export of refrigerated blood products and tested under ISTA ambient profiles. Durable construction ensures that the shipper can withstand the rigors of third-party logistics (3PL) and airline handling. Each shipper includes a comprehensive thermal performance design qualification report and packout instructions.
