

MaxPlus PharmaPack SP™

Transport of Temperature-Sensitive Specialty Medication

Designed for expedited shipping of specialty pharmacy medication, the MaxPlus PharmaPack SP™ system delivers quality performance in a compact container. The system uses a custom PCM and innovative insulation to provide a much lighter and smaller solution than traditional EPS or urethane shipping systems. Six sizes allow for 2-8°C shipping and delivery for up to 48 hours.

Compact and Efficient

The MaxPlus PharmaPack SP is up to 75% smaller than current specialty pharmacy logistics solutions. With as many as 350 shipping systems per pallet, the pharmacy operating environment will be less crowded and cluttered compared to your current shipping systems.

Lightweight, Cost-Effective

The shipping and dimensional weight of the MaxPlus PharmaPack SP is typically between 50% and 70% less than current EPS or urethane shipping systems. This can cut the costs of inbound shipments from suppliers and outbound shipments to patients by as much as half.

At-a-Glance

- Qualified systems for 36 and 48 hour refrigerated transport
- Compact and lightweight to reduce shipping costs
- Environmentally friendly – recyclable
- Reduces pharmacy storage space requirements and courier reloads
- Meets all URAC 5.0 requirements
- Turnkey solution - all packing material and coolants included

MaxPlus PharmaPack SP™

Simplified Packouts

To maximize cost efficiencies further, the system is qualified to use the same packout materials for all seasons. This eliminates the need for carrying multiple product mixes seasonally. The MaxPlus PharmaPack SP is a turnkey system, all necessary packing material and gel packs are included with each shipper.

Environmentally Friendly

The MaxPlus Pharmapack SP was designed with sustainability and minimizing environmental impact in mind. Unlike the current large, bulky, multi-component shipping systems, the PCMs can be safely disposed of and the outer corrugated box can be recycled.

Specifications

The MaxPlus Pharmapack SP system was designed by scientists specifically for specialty pharmacy shipments, and is tested to ISTA 7D profiles, and meets all URAC 5.0 requirements.

The MaxPlus PharmaPack is up to 75% smaller and 50% lighter than current specialty pharmacy packaging solutions

Capacity (liters)	Qualification (hours)	Dimensions L x W x H (inches)	Temperature	SKU
1	36	8.25 x 8.25 x 10.5	2 - 8°C	1RPPF36-1
2	36	6 x 6 x 8.875	2 - 8°C	1RPPV36-2
	48	6.5 x 6.5 x 9.25		1RPPV48-2
3	36	11.25 x 9.25 x 9.25	2 - 8°C	1RPPF36-3
4	48			1RPPV48-4
6	36	15.25 x 12.25 x 9.25	2 - 8°C	1RPPF36-6
10	48			1RPPV48-10

“We can actually walk through the pharmacy now that there are not boxes all over the place. We ship 40 boxes a day and now that we have tried the MaxPlus PharmaPack System we can fit all of them on a small desk to prepare for packout.”
